

FY2007-2008 Application for DEP Approved Recycling Program (DARP)

For municipalities with curbside refuse collection

Municipality name: _____

The DEP Approved Recycling Program (DARP) is a voluntary program that rewards municipalities for establishing comprehensive recycling programs. These programs are critical to the Commonwealth's ongoing effort to protect our environment and quality of life by reducing waste generation and disposal.

DARP status exempts municipal solid waste loads from comprehensive inspections for "waste ban" materials (paper; glass, metal and plastic containers; leaves and yard waste) at solid waste disposal facilities. Waste loads from DARP communities are inspected for the presence of white goods, lead-acid batteries, cathode ray tubes (CRTs), or whole tires. DARP status reflects a municipality's commitment to providing access to recycling and composting programs and to educating residents about waste reduction.

"Waste Bans" restrict the disposal and transfer for disposal of certain hazardous and recyclable materials at solid waste facilities in Massachusetts, per 310 CMR 19.017.

Qualifying municipalities will have DARP status for the period July 1, 2006 through June 30, 2008. A municipality's DARP status can be revoked if it is found that any of the program criteria on which its DARP status is based are not maintained during that period.

Municipalities Qualify For DARP By Meeting A Set Of Established Criteria (see reverse):

If you are able to meet the required elements and check off at least one statement under Recycling Commitment and Access, Composting Commitment and Access, and Public Education and Participation, your municipality will receive a DARP designation. MassDEP will send notification of DARP status to your Chief Executive Officer, and will include the municipality on the list of DEP-Approved Recycling Programs to be distributed to solid waste facility operators in the Commonwealth. MassDEP may ask you to submit documentation supporting this application.

NOTE: DARP status only applies to solid waste loads contracted or collected by the municipality on behalf of residents and/or businesses. DARP status does not apply to waste loads contracted by individual residents, multi-family buildings or businesses in a DARP municipality, or to the municipality itself (e.g., the Parks Department), unless otherwise deemed so by MassDEP.

By signing this form the municipal official certifies that information provided here is accurate to the best of their knowledge.

Name of Municipality's Chief Elected Official (print): _____

CEO Signature: _____

Title: _____ Date: _____

Complete this form, sign it, and return it no later than June 15, 2006.

Please mark your envelope "DARP APPLICATION" and mail to:

John Crisley
MA Department of Environmental Protection (DEP)
1 Winter Street, Consumer and Transportation Program
Boston, MA 02108

RECYCLING COMMITMENT AND ACCESS

Required: The municipality maintains a curbside recycling collection service year-round, with pick-ups at least every other week. The program must include, at a minimum: newspaper, mixed paper and corrugated cardboard, glass, metal, and plastic containers #1 - #2. Municipalities must also meet either A, B, or C (see below).

Elective: Municipalities must also meet at least one of the following:

- ☐ A. The municipality provides or facilitates curbside recycling access to small-to-medium sized businesses. Please describe (attach additional pages if necessary): _____ OR;
- ☐ B. The municipality has established a recycling program in all of its offices (town hall, police, DPW, etc.), and schools. This should include collection of recyclable paper, at a minimum: OR
- ☐ C. The municipality provides recycling access to a majority of its multi-family buildings by EITHER collecting, or contracting for collection of paper and containers; OR enforcing an ordinance or bylaw requiring haulers servicing multi-family housing to provide recycling and trash collection as an integrated waste management service at a single price.

COMPOSTING COMMITMENT AND ACCESS

Required: The municipality has enacted a by-law, ordinance, regulation or has a municipal solid waste / recycling contract language requirement stating that leaves and yard waste generated by residents must be collected separately and not disposed of with solid waste. Municipalities must also meet either A, B, or C (see below).

Elective: Municipalities must also meet at least one of the following:

- ☐ A. The municipality provides curbside collection of leaves and yard waste at least every other week to all municipally served households from April 15 through November 30; OR
- ☐ B. The municipality provides curbside collection of leaves and yard waste to all households at least 12 times per year (fall and spring dates to be determined by the municipality) AND operates a home composting bin distribution program, which includes publicizing the availability of home composting bins and disseminating information on home composting; OR
- ☐ C. The municipality has a drop-off composting site for leaves and yard waste open weekly at least 4 weekend hours each week. The drop-off must be open from April 15 through November 30 and the municipality must publicize the availability of the drop-off composting site.

PUBLIC EDUCATION AND PARTICIPATION

Required: The municipality mails information annually to all residents publicizing its recycling and composting programs. A MassDEP-granted mailing satisfies this requirement. The mailing shall include information about the municipality's recycling bylaws or ordinances, and information about the state waste bans.

Alternatively, municipalities may choose to update the community's recycling and composting information at least twice annually on the Earth-911 web site (www.earth911.org). Municipalities must also meet either A, B, or C (see below).

Elective: Municipalities must also meet at least one of the following:

- ☐ A. The municipality has an annual per capita residential recycling rate for paper, bottles and cans of 100 pounds or greater as calculated by DEP using data submitted by the municipality on the CY2004 Municipal Recycling Data Sheet; OR
- ☐ B. The municipality has a unit-based pricing or "pay-as-you-throw" program that charges users on a per-unit basis for solid waste disposal and provides recycling for no separate fee; OR
- ☐ C. The municipality **enforces** a mandatory recycling by-law, ordinance, or regulation, or has a current municipal solid waste / recycling contract requirement stating that recyclables generated by residents are collected separately and not disposed of with solid waste.
- ☐ Check this box to indicate you are enclosing a photocopy of your municipality's by-law, ordinance or solid waste contract language and enforcement protocol or procedures.
